Career Objective

A passionate final-year B.Tech IT student driven by a strong inclination toward UI/UX design and frontend development. Actively exploring evolving design tools, trends, and principles to craft seamless, user-first experiences—while contributing to impactful, design-led innovations that bridge creativity, technology, and purpose. Dedicated to bringing ideas to life through clean, responsive interfaces and meaningful digital experiences.

Education

Amal Jyothi College of Engineering (Autonomous), Kottayam, India 2022 – Present
Bachelor of Technology, Information Technology

Farook Higher Secondary School, Calicut, India 2020 – 2022
Higher Secondary

Experience

UI/UX Intern June 2025 – July 2025
Zephyr Technologies & Solutions Pvt. Ltd., Bangalore, India

- Designed high-fidelity UI prototypes in Figma with a focus on usability and clarity.
- Built empathy maps in Miro and mind maps in XMind for user-centered flows.
- Applied key UI/UX principles to improve engagement and interface quality.

Python ML, AI, DS Intern June 2024 – June 2024
Maitexa Integrating Minds, Calicut, Kerala

- Developed a CNN using Keras and TensorFlow to classify CIFAR-10 images.
- Enhanced model accuracy with data augmentation and dropout techniques.
- Tracked performance using accuracy metrics and training visualizations.

Projects

Tech Problem Aggregator (On going)
Main Project — Amal Jyothi College of Engineering

- Developed a platform to match real-world tech problems with innovators, students, and developers.
- Aggregated verified problem statements from multiple sources using automated scraping and NLP.
- Designed a recommendation engine to suggest challenges based on user's skills and interests.

Alertify – Real-Time Drowsiness Detection App
Mini Project — Amal Jyothi College of Engineering

- Built a mobile app using React Native and Flask to detect driver drowsiness in real time.
- Used facial analysis with OpenCV and ML to monitor eye movement and trigger alerts.
- Implemented location tracking and automated SMS alerts to emergency contacts.

Technical Skills

Languages: Python, Java, C, HTML, CSS, JavaScript, R

Web & Backend: Node.js, MongoDB, MySQL, Postman

Design Tools: Canva, Figma

Other Tools: Word, Excel, VS Code

Certifications

- UI/UX Workshop — Makerhub IEDC, Feb 2024
- Web Development — Internshala (NSDC), Nov 2024
- Node.js Backend Workshop — Leopard Tech Labs, Oct 2024

Additional Information

Soft Skills: Problem Solving, Leadership, Communication, Time Management, Teamwork, Critical Thinking

Languages: English (Fluent), Malayalam (Native)
